ABOUT ME

Possesses the ability to self-learn and continuously improve technical skills, demonstrated through diverse range of self-taught knowledge. Experienced in various programming languages and design tools, showcasing adaptability and versatility. Currently enrolled in NCC computing Diploma program to further education and skills in the IT industry. Seeking opportunities to utilize skills and knowledge to make a positive impact in the field.

WORK EXPERIENCE

ACCOUNTANT 2021 - 2022
CONVENIENCE STORE | PART-TIME

Growing up, I have been actively involved in the management of my family's convenience store, which has provided me with valuable experience from a young age. As I transitioned into adulthood, my interest in the business has only grown stronger. While my true passion lies in the field of IT, I also deeply value the importance of maintaining the smooth operation of my current business. This hands-on experience has instilled in me a strong sense of responsibility and a keen understanding of the fundamental aspects of running a business successfully.

FRONTEND DEVELOPER 2022 - Present
TEE HTWIN | VOLUNTEER

I am currently working at Tee Htwin as a Frontend Developer, where I have gained extensive experience in both project development and teamwork. My responsibilities include working on the Aligate Project, a frontend development initiative that involves creating an attendance recording system using QR code scanning on a web server. Additionally, I have contributed to the Recommendation Form, known as the Atxapt project, where users can make selections using checkboxes and receive results based on machine learning algorithms. I have also gained proficiency in testing and have experience working with AWS cloud services.

FULL STACK DEVELOPER 2023 - Present
NATIONAL CYBER CITY | FULL TIME AND FREELANCE

I am currently employed as a Full Stack Developer at National Cyber City, where I have gained comprehensive experience in both frontend and backend development. My expertise includes working with Next.js, TypeScript, Python, and Django. I have been involved in a project focused on developing a ticket system for selling cycle tickets. This project incorporates image processing capabilities to scan wave pay and kpay, as well as export transaction data. Additionally, I have taken on other projects concurrently, such as developing a Point of Sale system using React, React Native, Python, and Django. I am also currently learning Rust and applying it to create a small e-commerce platform. Furthermore, I have future plans to develop a Point of Sale system using PyQt and even create my own custom operating system. My diverse skill set and experience demonstrate my ability to handle complex projects and adapt to different technologies and frameworks.

SOFTWARE ENGINEER

2023 - Present

ACE DATA SYSTEM | FULL TIME

As a dedicated Software Engineer at Ace Data System, I successfully secured a position through a rigorous selection process, showcasing my proficiency in various testing projects. My role encompassed working with cutting-edge tech stacks, including React Native, React, Node, and Next.js. I underwent comprehensive training, following the company's standardized procedures, which provided me with a step-by-step approach and invaluable hands-on experience. In the dynamic environment of an enterprise banking company in Myanmar, I honed my teamwork skills and became adept at utilizing the software development cycle. This experience not only enriched my technical skills but also instilled a deep understanding of collaborative problem-solving and project management within a professional setting.

MUSIC PRODUCER

2021 - Present

SELF EMPLOYED

Before acquiring my IT skills, I initially pursued my passion for music production. It has been a hobby of mine, and I decided to pursue both IT and music concurrently. One of my future plans is to establish my own business, specifically an e-commerce website centered around music. This platform will offer various features, including a chat system, a music player similar to Spotify to promote local music, and the sale of both global and locally prioritized brands. My experiences in music production have motivated me to learn and expand my knowledge in the field of IT to complement my entrepreneurial aspirations.
